

Chandra Finn

Software Engineer

Flexible, autonomous graduate with an MS in Computer Science looking to leverage experience building responsive and scalable web apps to solve problems that delight end-users. Motivated to learn from senior engineers while sharing innovative ideas in an environment like Odoo that values personal growth.

WORK EXPERIENCE

FreshDirect

Full Stack Engineer Intern

Portland, OR | April 2022 - September 2022

- Constructed Angular components for FreshDirect's grocery delivery interface, reducing average customer page load time by 1.8 seconds.
- Scoped and prioritized 9 feature requests within an agile sprint cadence, routing highest-impact items to the top of each cycle.
- Authored end-to-end test suites for new checkout features, driving a 23% drop in customer-reported defects.
- Designed normalized database schemas for order fulfillment data, saving the engineering team \$7.2K in projected implementation costs.

Marketing Science Associates

Full Stack Engineer Intern

Pittsburgh PA | April 2021 - September 2021

- Implemented RESTful APIs in Django that fed campaign performance data to the analytics team, accelerating report generation by 22%.
- Deployed a Selenium-based regression testing framework for a client-facing marketing dashboard, cutting reported bugs by 14% month over month.
- Rewrote onboarding and troubleshooting documentation for 3 internal tools, shortening new-hire ramp-up time by roughly one week.
- Flagged architectural risks during code reviews that prevented two proposed schema changes from degrading query performance at scale.

PROJECTS

Poker Simulation

Creator

- Engineered a full-stack simulator using cards.js and Flask that visualized poker hand outcomes against four distinct opponent play styles.
- Trained a scikit-learn probability model on 12,000 synthetic hands to predict win likelihood under variable bluffing scenarios.

Cryptocurrency Price Tracker

Creator

- Integrated live pricing data from three exchange APIs into a PostgreSQL backend with automated 6-minute polling intervals.
- Rendered interactive candlestick and trend charts in D3.js, letting users compare token movements across custom date ranges.

SKILLS

Hard skills

- JavaScript (Angular) · Python (Django, scikit-learn) · SQL (PostgreSQL) · RESTful API Design · Selenium Test Automation · Git Version Control

Soft skills

- Agile Sprint Planning & Backlog Prioritization · Technical Documentation for Cross-Functional Teams

EDUCATION

M.S.

Computer Science

Portland State University

2022 - 2024

Portland, OR

B.S.

Computer Science

University of Pittsburgh

2018 - 2022

Pittsburgh, PA
